

ADOT PROJECT CANCELED

Rock Fall Containment Project on SR 89A

The Arizona Department of Transportation (ADOT) is announcing that the rock fall containment project on SR 89A in Sedona has temporarily ceased due to unexpected weather conditions and prescribed ecological restrictions within Oak Creek Canyon.

The contract, awarded to FNF Construction in July 2004, has been mutually terminated and the project will come to a close in the first week of March 2005. At that time, the project area will return to normal conditions until later this year when ADOT will issue a new contract to complete the remaining work.
